

HODGEMAN COUNTY HEALTH CENTER

As of Jan. 1, 2019, the Centers for Medicare and Medicaid Services have required all hospitals to make available their Charge Description Master (CDM)

The CDM is a comprehensive listing of individual procedures, services and items billable to a hospital patient or a patient's health insurance provider, but it is not reflective of what a patient actually pays, or what insurance will pay. While this document outlines standard base charges, these are not necessarily charges a patient will see. Every patient is unique and actual patient payment is highly dependent upon a combination of factors. Even for similar procedures at the same facility, what a patient actually pays may differ based on their insurance plan and other factors. Cost is only one factor consumers should review when making healthcare decisions. Outcomes, quality/safety data and experiences should also be considered.

Please call our business office at, 620-357-8361, to understand your individualized case. We support helping patients make informed decisions, and provide individualized assistance in determining the actual cost of care.
